

[Activitats](#)**Activitats: Erasmus+ meeting in Finland**

Enviada per rserenti el 21/Nov/2022 - 09:14

This week three teachers from our high school (Antoni Carbonell, Rosa Serentill and Sole Gonzalo) have spent four days in Finland to meet our Erasmus + partners. Our destination was Jyväskylä, in the center of Finland, and there we were welcomed by Pirjo and Jarkko, who took us to their high school Gradia Jyväskylä and showed us their facilities as well as their projects. During these days, we worked together to organize the Erasmus + project and the future mobilities with our students. Thanks to this visit, we learned more about Finnish education by the school principal and we set the main goals with our partners, which are all related to environmental issues like sustainability and climate change. Furthermore, we were also invited to a meeting on sustainable transportation by the environmental responsible of Jyväskylä at the city hall. All in all, it was a fantastic trip to meet our Finnish partners and the experience was very enriching for everyone involved.
